Macomb County Health Department

Environmental Health

Environmental Health Services

Designed to promote & protect public health by providing a safe & healthful environment.

The Environmental Health Division works in cooperation with local, state & federal agencies. Its services include consultation, plan review, inspection, testing, education, monitoring, investigations & enforcement.

The Division annually provides more than 80,000 services to the public & private sectors.

Food Service Sanitation

Statutory Authority:

- Public Act 92 of 2000

This program is designed to protect the health of the consumer by working to assure that food is safe from contamination & adulteration in the over 2,200 licensed food service establishments in Macomb County. The primary objectives are to:

- Protect the community from unsafe foods
- Prevent outbreaks of foodborne illness

To achieve these goals, Macomb County's comprehensive program consists of:

- Plan review, industry education, food service establishment inspections, regulation & licensure of restaurants, bars & vending machines and epidemiological investigation of foodborne illnesses.

Swimming Pool Inspection Program

- ◆ Conducts annual inspections of all public swimming pools in Macomb County.
 - Inspections include re-circulation and disinfection systems and verification of safety equipment.
- ◆ Verifies ongoing water quality testing.
 - Monitoring of pH, disinfectant and water bacterial levels.
- ◆ Responds to pool related complaints.

Shelter Management

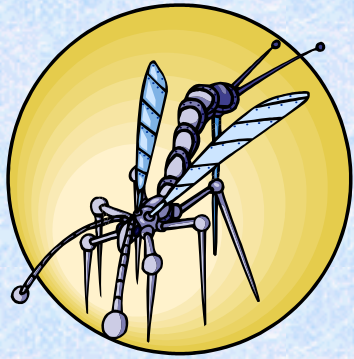

Statutory Authority:

- Public Act 368 of 1978
- Municipal Housing Codes

This program includes the following areas:

- ◆ Insect and rodent management consultation
- ◆ Public Health Nuisances
- ◆ Adult/Child Group Care Facilities
- ◆ Housing (community contractual services)
- ◆ Campgrounds

Encephalitis/West Nile Virus Monitoring

Encephalitis and WNV (West Nile Virus) are viral infections that can be spread to birds, horses and humans by infected mosquitoes.

During the mosquito season (July through September), the MCHD routinely monitors for the presence of these viruses in Macomb county by trapping mosquitoes on a weekly basis and testing them for the presence of West Nile Virus.

In addition, statistics are maintained on dead crow sightings as a potential indicator of the presence of WNV.
